

MAINTENANCE

- **The nozzle should be inspected before and after each use to ensure it in good operating condition.**
- **If you encounter the following situations, the nozzles should be taken out of service and repaired.**
 - (1) Controls that are either inoperable or difficult to operate.**
 - (2) Excessive wear.**
 - (3) Water leaks.**
 - (4) Broken spinning teeth.**
- **Periodically flushing the nozzle with clean water and remove the dirt from the nozzle.**
- **Regularly check the baffle screw to be sure it is tight enough.**
