

DUO-SAFETY LADDER CORPORATION

Halyard/Rope

All rope furnished with Duo-Safety Ladders as standard continues to be pure manila rope. The factory uses manila rope because it still offers the least expensive and best combination of desirable features available in rope today:

- Soft - not stiff
- Abrasive - does not slip in gloves
- Will not stretch with heat exposure
- Has a minimum tensile strength of at least 825 lbs (No ladder requires more than 75 lbs to raise)
- Readily available for replacement in any local hardware store

However, halyard replacement can be any rope material you choose - as long as NFPA-1931/1932 is followed.

Available in standard 3/8" or 1/2" diameter priced by the foot or available in 600' or 1200' coils. Our standard rope size is 3/8" on most ladder models. All extension ladders 40 ft and over are equipped with 1/2" manila rope as standard.

REPLACEMENT ROPE LENGTHS

SOLID SIDE LADDERS

16' 1000A - 22 ft
